THE EXHIBITOR that has hired stands and wishes to assemble, arrange and/or decorate its stand through a third-party company that provides such services, may hire any external supplier provided that it complies with the approval process detailed in “ANNEX - SUPPLIER REGULATIONS.”

Any changes to the original design of the stand must be approved by the World Mining Congress 2026. The new design must be consistent with the overall style of THE EVENT and must therefore be submitted to the World Mining Congress 2026 by the dates specified in the SUPPLIER REGULATIONS (See ANNEX: SUPPLIER REGULATIONS)

The EXHIBITOR must coordinate with its stand builder—the company responsible for assembling, setting up, and/or decorating your stand—to submit the technical documentation required through the IIMP’s SYSTEM for design approval and subsequent implementation.

Stands will be evaluated based on whether they are designed and arranged in accordance with environmental sustainability and social responsibility, incorporating measures that minimize their environmental impact throughout their entire life cycle. THE IIMP is not to be held responsible for the selection of the supplier or for the fulfilment of the contractual obligations agreed upon between THE EXHIBITOR and its provider. THE IIMP is exempt from any liability in the event of breach, damages, or losses arising from such a relationship.

Section 16. Decoration

However, THE IIMP reserves the right to supervise and make decisions regarding any installed elements and may, at its discretion, order the removal, replacement, relocation, or modification of any components that do not comply with THE EVENT'S technical and/or regulatory guidelines.

All of the above measures may be implemented without prior authorization from THE EXHIBITOR, and any costs incurred shall be borne entirely by the latter.

The installation of any items that, due to their size, location, or characteristics, obstruct the view of other stands, detract from the overall aesthetics of the venue, interfere with evacuation routes, or pose a safety risk to attendees will not be permitted.

The EXHIBITOR must ensure that all materials used in the decoration, construction, and furnishing of the stand strictly comply with current safety, fire prevention, and environmental management regulations applicable to the Event, as well as local regulations.
