

World Mining Congress

MINING FOR THE FUTURE: Trust, Transformation and Technology

Aligning with the ancestral celebration of the Sun, a moment of renewal, focus and long-term vision. The world needs more metals, delivered fast and responsibly.

Each day opening plenary interactive discussions will focus on three fundamental challenges:

- 1 Project Planning and Execution, inspired by Bent Flyvbjerg, a world authority on megaprojects
- 2 Unlocking Existing Value. Getting more from what we already have, with mining companies focused on productivity
- 3 Shifting Mindsets, guided by Beau Lotto, recognized for his work on perception

Sustainability and responsibility are not treated as separate topics; they are integral to every discussion, shaping how we think about **trust, transformation and technology**.

The Congress is intentionally designed to bring diverse global voices into action.
